TRAINING WORKSHOP

Training Session and Customer Support for the
City of St. Louis Building Energy Performance Standard

Hosted by **spire** 

Join Spire for a technical workshop to assist in planning for this important initiative.

Friday, Aug. 5, 2022 | 10:00 a.m.–1:30 p.m.

700 Market Street, St. Louis, MO 63101

Lunch will be provided by your host, Spire.

Who should attend:

- Commercial building owners and operators, architects and engineers

Program outline:

- **Katarina Michalova, City of St. Louis:** Introduction and overview of the City of St. Louis Building Energy Performance Standard
- **Jessica Deem and Emily Andrews, Building Energy Exchange – St. Louis:** Overview of the Building Energy Exchange – St. Louis and their available resources
- **Spire Business Development and Spire Energy Efficiency teams:** Spire's commercial and industrial services, including commercial rebates
- **Annie Smith and Jonathon Bell, Ross and Baruzzini:** Benefits of a commercial building audit in energy planning
- **Jennifer Geen, Trane Energy Services and Solutions:** Specialized energy services solutions for commercial customers considering energy efficiency improvements
- **Dave Westbrook, Blackmore and Glunt:** Advancements and innovations in high-efficiency commercial boiler applications for replacement systems

Individualized breakout sessions:

(Available after the training session)

- Individualized customer support to assist with:
 - Creating a new Spire account in My Account to collect detailed usage history
 - Learning more about the Spire commercial rebate program (prescriptive and custom)
 - Creating and expanding an Energy Star Portfolio Manager account

Registration for this event is required.
